We want to be a community that spurs individual potential for a sustainable future.

We work in two locations:

Kibera Slums in Nairobi, Kenya.

Kisumu, Holo Village, western rural Kenya.

All our programs are designed and implemented by our Kenyan workers with the aim of responding to current needs.

KIBERA + KISUMU PROGRAMS

Child Sponsorship Program

We support over 117 children who live in Kibera slums and over 30 children in Holo, Kisumu. Sponsorship provides the neediest children with mentoring, education, access to medical care, as well as holistic support for the child and their family.

Transitional Scholarships

Spur Afrika believes in investing in our sponsored children into adulthood, therefore we endeavour to transition them into different streams of tertiary education, e.g. university and apprenticeships.

Champion Girls

Champion Girls aims to promote self awareness, confidence and holistic care among teenage girls and up to 100 girls attend. The girls look forward to covering topics about health, relationships and career, empowering girls to transition into confident and mature women.

Mobile Health Clinics & Oral Hygiene

We work to improve the health of children in Kenya through the provision of health services (medical and dental) and health education. We provide free health checkups and medication to children attending Spur partnered primary schools. In conjunction with a local Kibera clinic we have seen over 900 children per year. We also run an Oral Hygiene Campaign, which educates the children on good oral hygiene.

KIBERA PROGRAMS

Mentorship Program

We believe in local mentorship, and therefore we endeavour to pair each sponsored child with a local mentor. The aim is for the mentors to develop a relationship with their child, which will foster personal development and positive role modelling. We offer training and support to all our mentors.

Read It Know It Program (RIKI)

The program promotes reading and literacy within schools. We currently have 8 schools that participate.

Msingi

This is a specialised program that aims to teach business training skills to those who have an interest in starting or maintaining their business. This program has been run in different venues and for different groups, according to their individual needs.

KISUMU PROGRAMS

Kinda Girls

Kinda girls invites approximately 20 teen mothers (aged 13 to 18) every 6 months to join in a 12 week listening and learning program. Discussion and learning topics typically include life goals and challenges, sexual and reproductive health, relationships, negotiation skills, gender-based violence and avenues for seeking help and practical.economic skills development.

OUR MISSION

ENGAGE

We engage the local Kenyan community through authentic mentorship, culturally sensitive initiatives and sustainable programs.

EMPOWER

We empower children and young adults with skills to transform not only their own lives but the lives of their families and communities.

EDUCATE

We educate through the provision of schooling, extra-curricular activities and public health programs.
